Skin Rejuvenating Peel Treatment

How to Use the Skin Rejuvenating Peel

- 1.** Cleanse face with Cellbone Collagen Cleanser or facial soap. Apply Collagen Skin Refresher or Prep Skin Refresher.
- 2.** Saturate a cotton ball with Cellbone Glycolic or lactic Acid. Apply it evenly over the face avoiding eye area.
- 3.** Leave it on for 3 to 5 minutes (30 seconds to 1 minutes for the un-buffered peels). Leave-on time can be gradually increased as the skin's tolerance level to the peel increases. Do a test on a small area of the skin if you are using it for the first time.
- 4.** Wash off with cool water.
- 5.** Apply Cellbone Hydra CP + Gel or Neutralizer Skin pH Balancer.
- 6.** Be sure to use a sunscreen or limit sun exposure while using peel product.
- 7.** Use once or twice a week for 6 weeks and hold off up to 2 weeks for the skin cells to turn over. You may restart 6 week cycle.
